iPhone Setup

You can setup your iPhone to receive email either by **Active Sync** or via **POP/IMAP**

Active Sync

Setting up email on the iPhone via Active Sync requires unique information on a per user basis. Please contact Kined Support at support@kinedsystems.com before you proceed with steps below:

1. Select the **Settings** icon on your device
2. Select **Mail, Contacts, Calendars**.
3. Select **Add Account**
4. Tap **Microsoft Exchange**
5. The Exchange setup screen will open. Enter information accordingly and click **Next**
6. Your iPhone will now attempt to verify the account. You may receive an "**Unable to Verify Certificate**" message. Just select Accept to continue
7. Tap the Server field and enter the server address as provided by Kined Support and select **Next** to continue.
8. Your device might try to create a secure (SSL) connection to the Exchange server. Click allow to continue
9. Then select the information types (Mail, Contacts or Calendars) that you will like to synchronize with your Exchange Mailbox.
10. Tap on **Save** or **Done** once complete.

POP/IMAP

1. Select the **Settings** icon on your device.
2. Select **Mail, Contacts, Calendars**.
3. Select **Add Account.**
4. Tap **POP3/IMAP**
5. For the POP server, enter **pop.emailsrvr.com**
6. For the IMAP server, enter **imap.emailsrvr.com**
